

ENVIRONMENTAL POLICY

As AtaKey Patates Gıda Sanayi ve Ticaret A.S., we are committed to operating with an environmentally and friendly approach, embracing the principle of environmental sustainability throughout all production and supply stages of our frozen potato products and other coated products. At the end of this, we aim to:

- Use natural resources efficiently, choose environmentally and friendly products and raw materials, and protect biodiversity by assessing the environmental impacts of agricultural activities.
- To comply with nationally and internationally recognized environmental management systems.
- Minimizing waste generation, ensure reuse and recycling of waste based on the zero-waste principle.
- To ensure waste reuse, safe recycling, or recovery.
- To measure and reducing our carbon footprint, and demonstrating a climate change-sensitive approach by continuously improving energy efficiency.
- Developing strategies to prevent soil, air, and water pollution.
- To use water resources efficiently and develop innovative projects for water management.
- Regularly to assess climate change-related risks and build a resilient business model.
- We are committed to continuously improving our environmental performance and providing training to raise environmental awareness among our employees.
- We are committed to raising environmental awareness by ensuring that our environmental policy is understood and adopted by our stakeholders.
