

## **POLICY OF SUSTAINABLE AGRICULTURE**

As AtaKey Patates Gıda Sanayi ve Ticaret A.S., we are committed to implementing the principles of the Farm Sustainability Assessment (FSA) standard published by the Sustainable Agriculture Initiative within the scope of our seed potato farming operations. In this context, we aim to:

- Managing and continuously improving plant material selection, soil management, nutrient management, plant protection product selection and application, water management, biodiversity conservation, and emission calculations according to FSA principles.
- Protect the environment while increasing agricultural productivity, using water, fertilizer, and plant protection products efficiently and appropriately.
- Conduct activities that respect employee rights in our value chain in accordance with our corporate social compliance policy.
- Regularly assess the impacts of climate change on agriculture and develop the necessary risk management strategies to minimize these impacts.
- Provide training to our farmers on sustainable agricultural practices, increase their knowledge, and ensure the widespread adoption of sustainable agricultural practices.
- We are committed to monitoring and improving our sustainability efforts by monitoring the environmental impacts of agricultural activities and detailing reporting processes.
