

ISO 50001 SYSTEM POLICY OF ENERGY MANAGEMENT

As AtaKey Patates Gıda San. Tic. A.Ş., we are committed to continuously improving the efficiency of the total energy consumed for the production of frozen potatoes and other coated products and to regularly reviewing our energy consumption. At the end of this, we have established our energy policy.

- Optimizing energy consumption in accordance with legal and international standards and reducing energy losses through technological innovations.
- Monitoring and analyzing energy consumption data using digital tools to increase transparency and efficiency in energy management.
- Increasing the use of renewable energy by investing in current technologies and setting concrete goals in this area.
- Raising awareness among all our employees about energy efficiency, energy management, and renewable energy use through regular training programs.
- Acting in compliance with legal and other relevant obligations by monitoring and analyzing our energy performance and identifying opportunities for continuous improvement.
