REVIEW REPORT ON COMPLIANCE OF INTERIM OPERATING REPORT

To the Board of Directors of Atakey Patates Gıda Sanayi ve Ticaret A.Ş.

We have been engaged to perform a review on the compliance of the financial information included in the accompanying interim operating report of Atakey Patates Gıda Sanayi ve Ticaret A.Ş. ("the Company") as of June 30, 2026, with the interim condensed financial statements, which we reviewed. Interim operating report is the responsibility of the Company management. Our responsibility as the auditors is to express a conclusion regarding if the financial information included in the accompanying interim operating report is consistent with the interim condensed financial statements and explanatory notes, which we reviewed as the subject of the review report dated August 5, 2026.

We conducted our review in accordance with the Standard on Review Engagements ("SRE") 2410 "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review of interim financial information is substantially less in scope than an audit conducted in accordance with Independent Auditing Standards and the objective of which is to express an opinion on the financial statements. Consequently, a review of the interim financial information does not provide assurance that the audit firm will be aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Based on our review, nothing has come to our attention that causes us to believe that the financial information included in the accompanying interim operating report is not consistent, in all material respects, with the information disclosed in the interim *condensed* financial statements and explanatory notes, which we reviewed.

Corporate Governance Committee

The Corporate Governance Committee is instituted to evaluate the implementation of corporate governance principles within the Company. In cases where adherence is lacking, it investigates the underlying reasons for non-compliance and identifies potential conflicts of interest. It also provides recommendations to the Board of Directors to enhance corporate governance practices and oversees the activities of the Investor Relations Department.

Due to the structure of the Company's Board of Directors, separate Nomination and Remuneration Committees have not been established. Therefore, the Corporate Governance Committee will also assume the responsibilities of the Nomination and Remuneration Committees in accordance with the Corporate Governance Principles.

The Corporate Governance Committee meets at least quarterly and the meeting results are reported to the Board of Directors. The Committee's decisions serve as advisory recommendations to the Board of Directors, which retains the ultimate authority in making decisions on relevant matters.

Early Detection of Risk Committee

The Early Detection of Risk Committee is formed to proactively identify any risks that could jeopardize the Company's stability, growth, and advancement. Its mandate includes implementing necessary precautions and effectively managing the risks once identified. The Committee meets at least quarterly and the meeting results are reported to the Board of Directors. The Committee's decisions serve as advisory recommendations to the Board of Directors, which retains the ultimate authority in making decisions on relevant matters. The Committee updates the Board of Directors on all developments falling under its authority and responsibility.

Audit Committee

The Audit Committee oversees the Company's accounting system, the disclosure of financial information to the public and their independent audits. Additionally, it supervises the proper functioning and effectiveness of the Company's internal audit and control systems.

General Overview and Operating Sector

The company, with its facility located in Susuz Belediyesi in Afyonkarahisar, ranks among Turkey's highest capacity factories in its field, boasting an annual production capacity of 90,000 tonnes of frozen potatoes and 10,000 tonnes of frozen coated onion rings and cheese sticks. The facility covers 75,000 m² of indoor space and spans a total area of 157,000 m². As a result of its investment in innovative agricultural technologies and its state-of-the-art production line, the company contributes to the Turkish economy as one of the leading high-capacity factories both in its region and nationwide, providing employment to numerous producers integrated into the system and many other individuals.

Atakey Patates operates in the frozen food sector. The company's product portfolio includes various types of frozen potatoes, both coated and uncoated, such as French fries, apple slices, crinkle-cut, lattice fries, and red-coated crinkle fries, as well as frozen coated onion rings, coated cheese sticks and coated potato croquette.

Atakey Patates has imported high-quality seeds from abroad and started multiplying them for commercial potato production. Since 2015, the company has been conducting its own seed cultivation activities on land leased from TİGEM in Turkey and has established this system. It has a specialized team of agricultural engineers managing the seed planting process, employing the most advanced methods to produce high-quality seeds. None of the seeds or potatoes contain genetically modified organisms (GMOs), and they are subjected to critical testing and analyses during the growing season and harvest. Harvesting is carried out across approximately 40,000 decares of agricultural land with more than 100 farmers in 20 different cities. To ensure consistency and quality at the source of potato products, the company supplies seeds and fertilizers to its contracted farmers.

In addition to its main activity of commercial seed production, Atakey Patates also undertakes the procurement of raw materials and auxiliary supplies, seed selection, agricultural production, manufacturing, export, import, wholesale and retail sales, marketing, and distribution of its products.

The facility in Susuz Belediyesi includes storage areas such as a 7,500 m² Seed Warehouse, a 32,000 m² Raw Material Warehouse, and a 15,000 m² Cold Storage Warehouse. These consist of rooms equipped with storage systems, each having a capacity of 3,500 tons. Temperature and humidity are controlled by a state-of-the-art central computer system through entry and exit vents for cooling air.

As a significant player in the frozen potato production sector in terms of production and sales volume, the company contributes to the growth of the sector and Turkey's agricultural economy through its growth potential, diversification of sales channels, export opportunities, and new investment possibilities with its value-added product portfolio.

The sources of finance and, if any, the quality and amount of issued capital market instruments:

In addition to revenue generated from operations, the Company benefits from external sources of financing, including export loans and working capital loans. In addition, the Company completed its initial public offering (IPO) on Borsa İstanbul during the 2023 financial year and generated IPO proceeds of 1,114,848,000 TL through a capital increase.
